

Wednesday 30th September

Dear Parent and Carers,

We would like to encourage children to continue practicing Spanish at home. Just a few minutes each week can help build confidence and reinforce what they are learning in school.

Here are some free websites and apps we recommend:

- Lightbulb Languages: games, songs, stories and activities for primary-aged children.
- Duolingo: short, fun language-learning activities.
- Rockalingua: catchy songs, videos and games.
- BilinguaSing: French, Spanish, Italian & German songs for 0-11s
- Spanish Playground: stories, songs and engaging activities for children.
- BBC Bitesize Languages: simple language-learning activities for beginners.

For younger children, we also recommend searching for Super Simple Español and Canticos on YouTube for songs and rhymes.

At Daubeney, pupils also have access to Linguascope, an online language-learning platform. Pupils can log in at home to enjoy interactive games and activities that support both their Spanish learning and the development of other languages.

Encourage your child to teach you new words they have recently learnt at school, sing a Spanish song, or practice simple greetings together. Regular practice, even for 5–10 minutes, can make a big difference.

Kind regards,

Yours sincerely,

Sara Alonso

Federation Spanish Lead

Mr Gregory Logan

Head of School
