

24th May 2019

Year 6 - RSE

Dear Parents and Carers,

In Summer 2 we will be teaching the relationships and sex education unit of our PSHE program: Jigsaw.

We feel this is an extremely valuable part of your child's education and will ensure children are learning scientific facts about this topic, in a safe learning environment.

The sessions will look at the concept of the anatomy of humans, the human life cycle and the physical changes that occur during puberty.

Children will be taught in a variety of mixed and same gender classes. As part of this topic children will be invited to ask questions anonymously. Teachers will carefully choose and address these questions only if they link to the prescribed curriculum we teach.

You are welcome to come along to our parent workshop on Friday 7th June 2019 at 9:15am in KS1 hall if you wish to know more about what we are teaching in this topic.

Yours sincerely,

Mrs. J Thomas
Executive Head Teacher

Mr Logan
Head of School
