

3 reasons not to idle

The Pollution harms all of our health

The toxins pollutes our environment

Wasting fuel and money

It is against the law to idle your engine unnecessarily. You could be issued with a fixed penalty notice and have to pay a fine

What can you do?

- Think! Do I need to use my car? It is healthier to walk, cycle or scoot to school. It will also save you money.
- If you are parked for more than 10 minutes, switch your engines off. You'll save fuel.
- Don't idle anywhere, outside of school, in a carpark or outside your house.

Did you know air pollution contributes to 9500 deaths in London every year?

The British Lung Foundation have found "children living and attending school in highly polluted areas are more likely to have damaged lungs when they grow up".

Daubeney Primary School Anti-idling campaign

Please help us to look after our environment and look after our health and wellbeing.
